III. Technical briefings

The following technical briefings will take place during the Sixty-ninth World Health Assembly.

Thursday, 26 May 2016

12:30–14:15

Room XII

Health in emergencies

There will be interpretation in Arabic, Chinese, English, French, Russian and Spanish

Outbreaks and emergencies continue to pose major, ongoing risks to the health and well-being of communities, resilience of health systems, stability of national economies and progress towards sustainable development. Since 2000, the world has faced major public health crises, from severe acute respiratory syndrome (SARS) and pandemic H1N1 to cholera, Middle East respiratory syndrome (MERS) and Ebola. During the same period, natural disasters and conflicts have escalated with over 125 million people now in need of humanitarian assistance, the highest number on record. The new Health Emergencies Programme being established by the Director-General aims to better support Member States by enhancing WHO's performance in infectious hazards management, preparedness, health emergency information and risk assessment, and emergency response operations.

During this technical briefing, a panel of Member State and partner representatives will share perspectives on key elements of the new Health Emergencies Programme, focusing on the evaluation of country preparedness, emerging pathogens, risk assessments, the Health Cluster, protection of health and health care, and financing for health in emergencies.

Friday, 27 May 2016

12:30–14:15

Room XII

Migration and health

There will be interpretation in Arabic, Chinese, English, French, Italian, Russian and Spanish

Large movements of migrants and refugees have once again brought migration to the forefront of international attention. Globalization, conflict, poverty, urbanization, inequality and poor job prospects are among the reasons that compel people to leave their homes in search of a better future for themselves and their family. Despite many benefits of migration, migrants themselves remain among the most vulnerable members of society. Governments face the challenge of integrating the health needs of migrants into national plans, policies and strategies as recommended by resolution WHA61.17 on the Health of Migrants adopted in 2008. Urgent action is required to ensure the migrant's right to health and to implement migrant-sensitive health policies that incorporate universal health coverage and equitable access to quality health services regardless of the migrant's legal status.

WHO is working with the International Organization for Migration (IOM) and the United Nations High Commissioner for Refugees (UNHCR), among others, to tackle the health needs and improve the health status of migrant populations while managing the possible health impacts on the affected local populations. WHO and its regional offices have provided support to Member States in developing and implementing policies aimed at enhancing the role of the health sector in responding to the needs of migrant and affected local populations. This technical briefing will review the current situation and priorities related to migration and health, review best practices and look at lessons learnt and implications for the future of WHO's work in relation to migration and health. The human face of all that surrounds migration and health will be emphasized.
